EDUCATION

Baruch College/CUNY, Weissman School of Arts and Sciences | New York, NY January 2025 - Present
Bachelor of Science in Computer Science | **GPA:** 3.76 / 4.00 *Dean's List: Spring 2025; Fall 2025 (anticipated)*

Changsha University of Science & Technology | Changsha, Hunan September 2022 - August 2024
Undergraduate Coursework in Software Engineering (Transferred)

PROJECTS

Apache Iggy | Contributor & Reviewer June 2025 - Present

Tech Stack: Go, GitHub Actions, Behavior-Driven Development (BDD)

- Developed Go SDK BDD test suites using Godog, contributing improvements to the Godog framework when integrating it into Iggy.
- Refactored SDK to align with Rust SDK and Go best practices: adopted option pattern, updated method signatures, and optimized parameter types.
- Maintained CI pipelines combining linting, unit testing, and BDD tests, increasing code coverage and improving SDK reliability.
- Enhanced Go SDK with improved deserialization logic, expanded API coverage, and conducted code reviews.

DDhelper & Grubhelper | Developer & Entrepreneur January 2025 - August 2025

Tech Stack: Kotlin, Android AccessibilityService, Next.js

- Developed automation tools using Android AccessibilityService API to optimize schedule management for Doordash/Grubhub drivers.
- Developed a Next.js server for product key generation and activation.
- Distributed software to local drivers, iteratively improving usability and providing support.
- Generated over \$3000 in revenue through direct sales within 3 weeks.

Better CUNY | Developer May 2025 - Present

Tech Stack: TypeScript, Chrome Extension, React, Material UI

- Implemented a content script to scrape CUNY academic calendars and student schedules, exporting them as CSVs for Google Calendar.
- Automated student login processes via browser scripts, enhancing efficiency.

HOLD Cloud Desktop Service Platform | Backend Developer & DevOps January 2024 - April 2024

Tech Stack: Go, gRPC, Docker, MySQL, etcd, Redis, VNC

- Enhanced service security and consistency by synchronizing Docker TLS certificates and SSH configurations across distributed nodes using etcd.
- Implemented core container desktop operations: start, create, delete, scale, restart, and file transfer.
- Built a distributed container monitoring system (CPU, memory, storage, network, etc.) with Redis locks to prevent duplicate monitoring.
- Authored comprehensive deployment, API, and user documentation.

SKILLS

Programming Languages: Go, TypeScript/JavaScript, Java, C++, Python, Kotlin

Frameworks & Technologies: Gin, gRPC, SQL, Redis, etcd, React, Next.js, Spring Boot, CI/CD

Tools & Platforms: Git, Docker, Linux, Photoshop, LaTeX

Languages: Mandarin Chinese (Native), English (Fluent)
